Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method for applying a coating, classified in class 427, subclass 180.
- II. Claim 2, drawn to a particle coated shoe material, classified in class 428, subclass 143.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I, claim 1; and Group II, claim 2 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed could be made by coating the particles with a solvent carrier instead of by an electrostatic process.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art

Art Unit: 1772

as shown by their different classification, and since the fields of search are not coextensive, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Charles Baxley on 29 July 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503.
